- Facilitated by Dr Salwa Malik, BSUH
- 22 completed an online survey afterwards

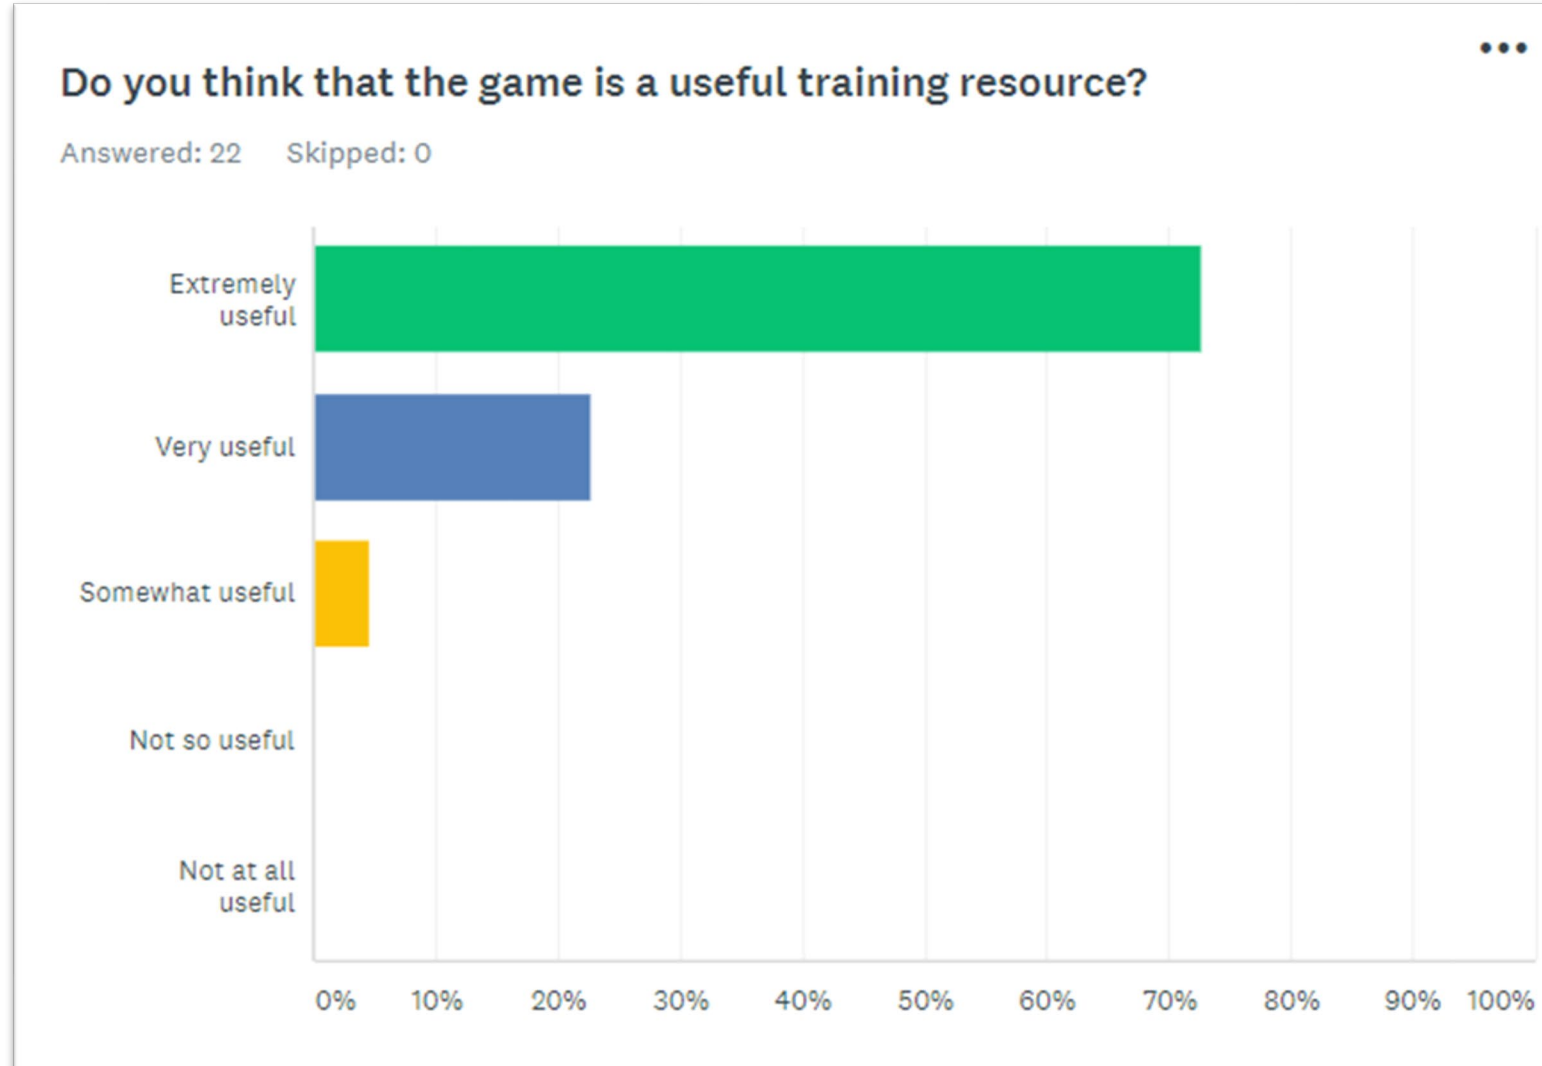

Which Deanery do you belong to?

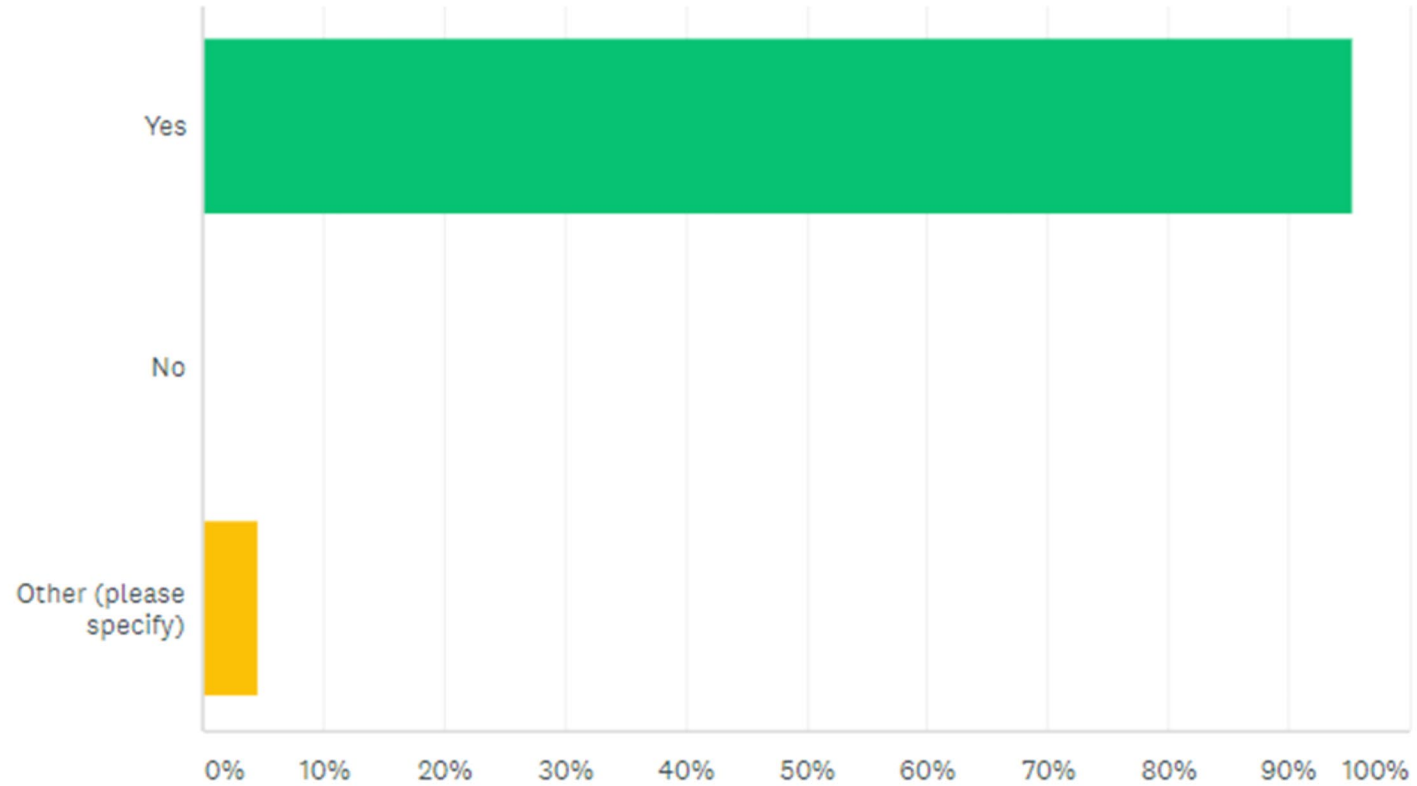

Answered: 22 Skipped: 0

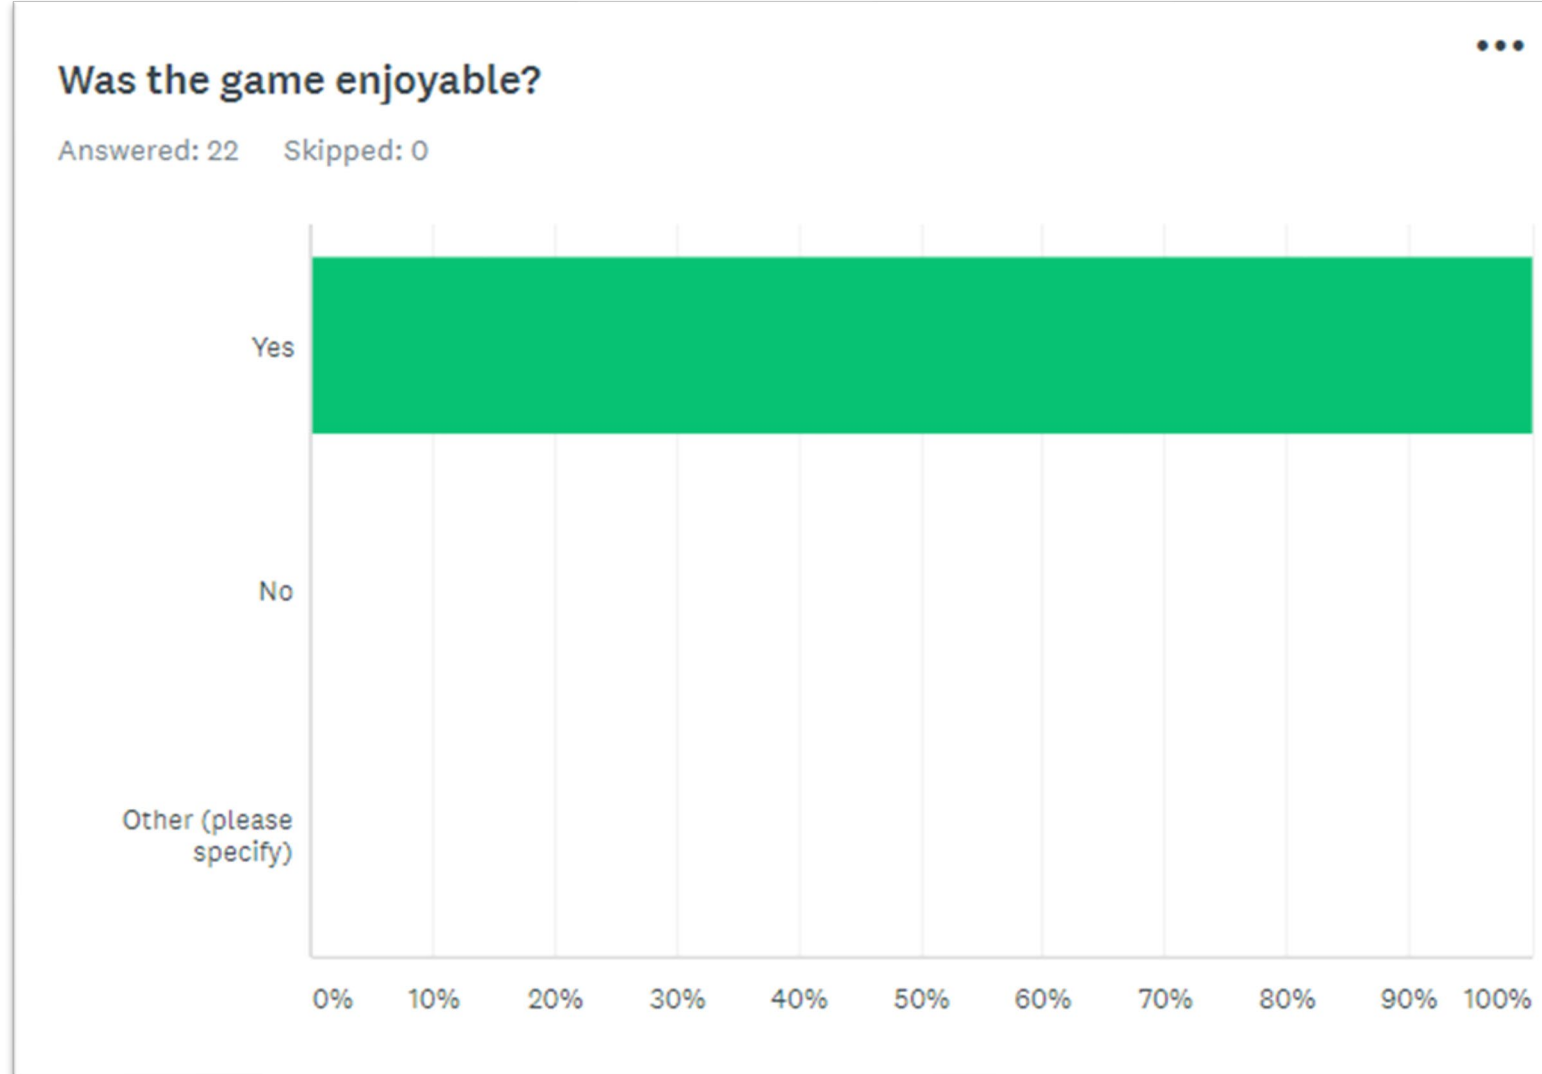

Will anything discussed/experienced during the game be helpful in daily practice?

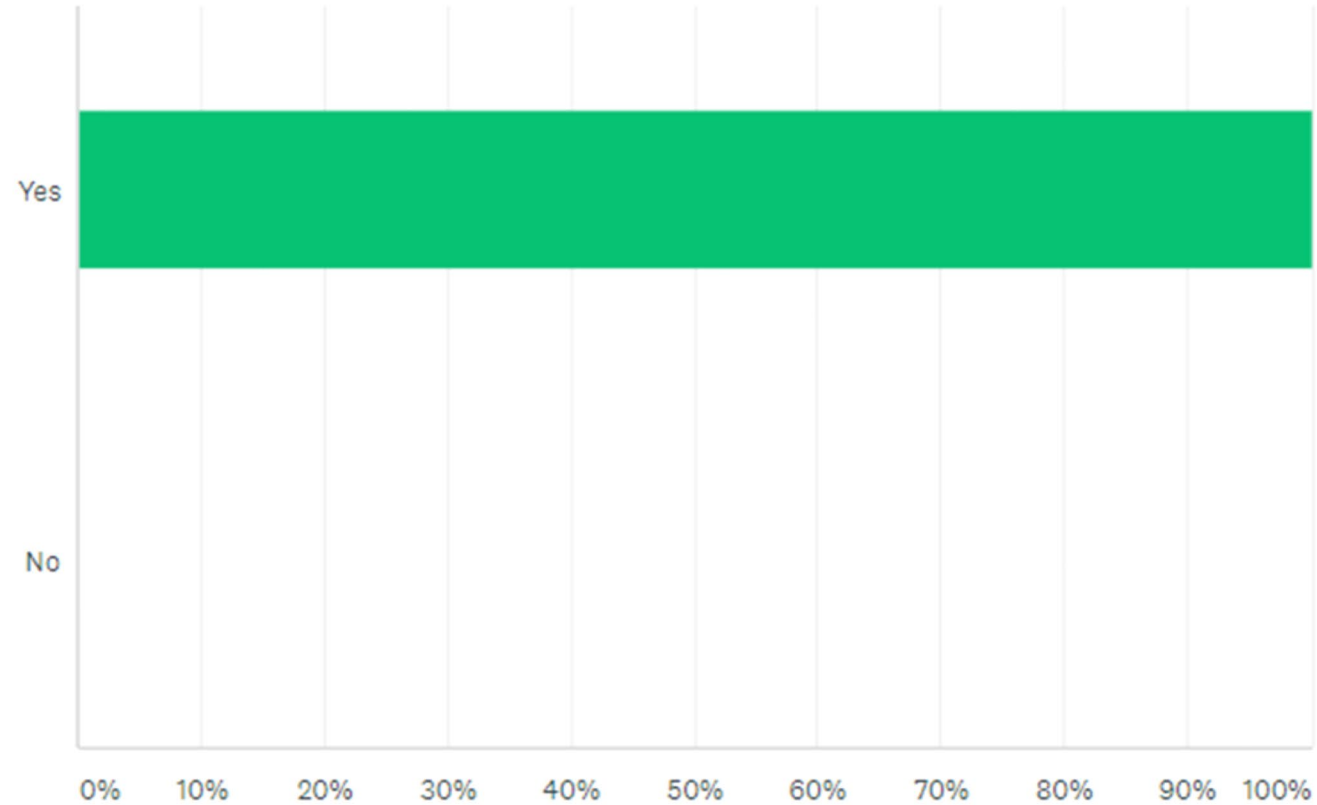

Answered: 22 Skipped: 0

Would you recommend the game to your colleagues?

Answered: 22 Skipped: 0

“This game is great! Fun to play but also raises some very real issues we face daily in the ED. Should definitely be incorporated in to training.”

“Good replication of real life every day issues that are faced in the emergency department. Did not think there would be a way to provide a safe environment to learn but with this game there is! ”

“Excellent - fast paced, fun, stressful, lots of realistic aspects, even better than I had hoped ”

“I work in a small DGH, as an ACCS SHO and overnight am often most senior in the dept. Obviously this is not ideal especially as at this level we have not previously had any specific management training. This game could be very useful in similar departments to help train more junior members of the team and introduce the concepts of shop floor management and practice this, for ACCS, but also if for example on the SHO Rota that night there is an f2 and a GP trainee who also are unlikely to have previous shop floor management training. Thank you ”

“I think it would be useful for other specialties to play as well!”

“Amazing resource for teaching decision making skills in a simulated and safe environment. Would love to have this is Severn!”

“Great game, really useful educational application. Wish my department had it.”

“Love the major incident cards!”
